

YOUR PROJECT PLANNER

DIY MADE EASY

Handy at DIY? Lay your lawn yourself and you can save yourself some money. Our project planner will help you plan how much grass you'll need and how much it will cost you. Here's how to use the planner...

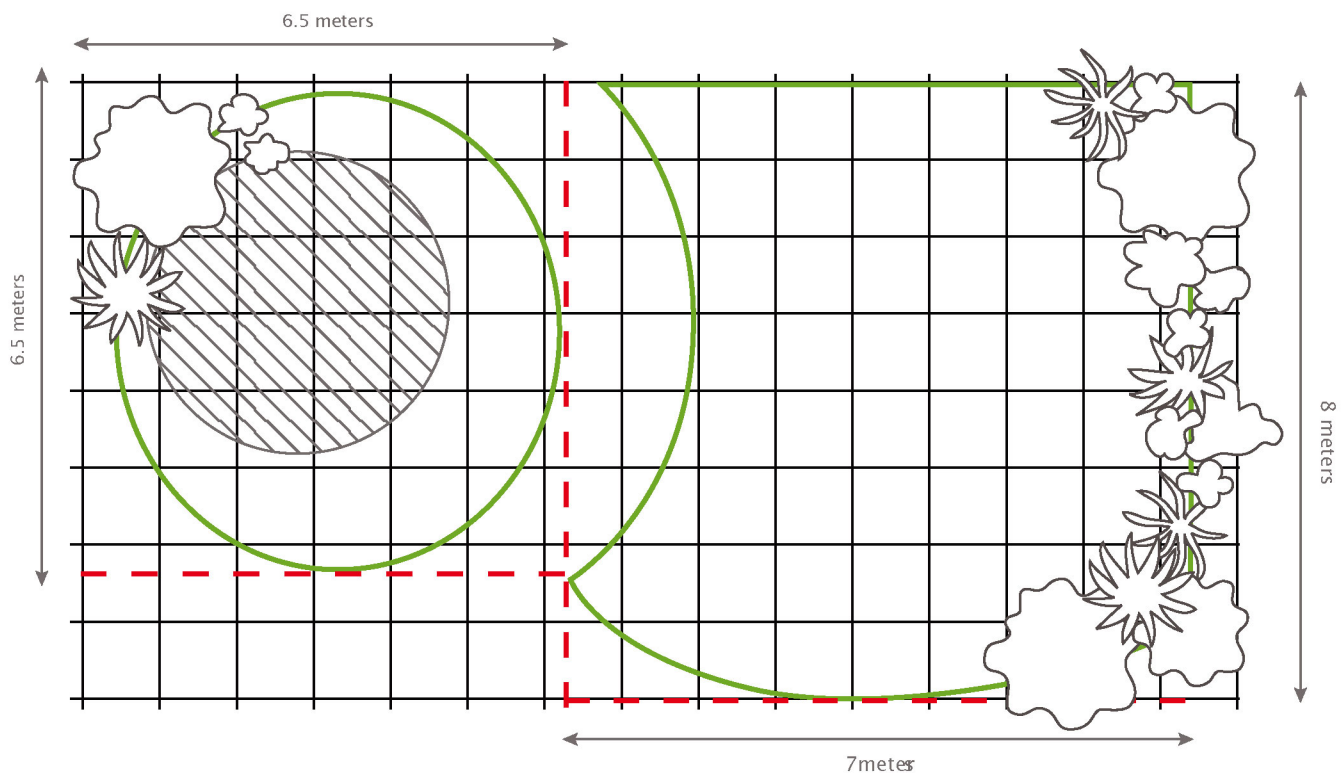

STEP 1

Work out the size of the lawn you want to replace.
Calculate this in square metres.

STEP 2

Use the blank grid (on page 3 of this pdf) to help you work out how many rolls of you'll need. Position the rolls so that you have a minimum number of joints. Allow some extra lawn length for a small amount of wastage depending on the design of your garden and how the rolls are laid.

The grass is supplied in 1.8m, 2m, 3.8m and 4m widths and roll lengths of up to 25m. Remember all rolls must be laid in the same direction to give the best finish.

YOUR PROJECT PLANNER

1 square = 1 meter²
